the vivid voices that speak from these pages are not those of historians or scholars they are the voices of ordinary men and women who experienced and helped to win the most devastating war in history in which between 50 and 60 million lives were lost focusing on the citizens of four towns luverne minnesota sacramento california waterbury connecticut mobile alabama the war follows more than forty people from 1941 to 1945 woven largely from their memories the compelling unflinching narrative unfolds month by bloody month with the outcome always in doubt all the iconic events are here from pearl harbor to the liberation of the concentration camps but we also move among prisoners of war and japanese american internees defense workers and schoolchildren and families who struggled simply to stay together while their men were shipped off to europe the pacific and north africa enriched by maps and hundreds of photographs including many never published before this is an intimate profoundly affecting chronicle of the war that shaped our world from the hardcover edition

war is now generally regarded as organised conflict waged by armed forces with superior weaponry usually seen as the main reason why one side prevailed this emphasis on the material culture of war is not confined to modern times but reaches as far back as the bronze and iron ages where the superior cutting power of iron and the relative ease of making iron weapons are seen as the reason for the change in civilisations while not denying that weaponry plays a major role in the history of war jeremy black s new book gives due importance to other factors often ignored or

undervalued by military historians conflicts such as the vietnam war and the soviet attempt to dominate afghanistan show it is not always the best armed who prevail the willingness of a nation to suffer losses organisational issues such as how troops are organised on the battlefield the nature of force structures and the organisation of societies for conflict and the political context can all make the difference between victory and defeat nor is it correct to assume that war is essentially a struggle between organised regular forces civil conflict terrorism and guerrilla activities are types of warfare which are too often excluded from discussions of military history in war an illustrated world history jeremy black has created a powerful work with a truly world wide scope encompassing warfare from ancient times to medieval from the nineteenth century to the future and from west to east this is a book which will appeal to all interested in military history with many original insights into the course of warfare in all parts of the world and a refreshing tendency to turn accepted interpretations on their head jeremy black offers something that other military historians do not a truly global history of war

in this concise history of war jeremy black ranges widely giving due attention to non western as well as western traditions the history of war is inextricably bound to the history of the world through a detailed exploration of world scale issues of warfare presented within a chronological framework that spans human history jeremy black skilfully illustrates this fact whilst providing the reader with other astute insights and compelling interpretations of war war a short history is a dramatic move away from the formulaic western approach to military history too narrow in its focus on wars specific to the west and too simple because of an over reliance on a technologically deterministic reading of warfare this approach has been rejected by jeremy black in favour of a global model that takes all factors into account when considering the strengths and weaknesses of a particular military tradition this is a book that is as important for its relevance to current world issues of conflict as it is for its thorough consideration of a monumentally significant

aspect of human history

an introduction to the works of authoritative and innovative chinese authors whose writings focus on the future of the chinese military these carefully selected representative essays make chinese military thinking more accessible to western readers it reveals for example china s keen interest in the revolution in military affairs this volume is an important starting point for understanding china s future military modernization must reading for every executive of every western firm doing business in china readers will be impressed by china s ambitions in space information warfare stealth and robots in future warfare photos

one of the most momentous and destructive wars in european history the thirty years war has long been studied for its diplomatic political and military consequences yet the actual participants in this religiously motivated seemingly endless conflict have largely been ignored hans medick and benjamin marschke reveal the thirty years war from the perspective of those who lived it their introduction provides important insights into the roiling religious and political landscape from which the war emerged as well as a thoughtful examination of the war s stages and enduring significance an unprecedented collection of personal accounts many of them translated for the first time into english combine with visual sources to convey directly to students the experience of early modern warfare incisive document headnotes maps and illustrations a chronology questions to consider and a bibliography enrich students understanding of this fateful war

the military revolution and revolutions in military affairs updates two central debates in military history the one surrounding the concept of military revolution and the one on military affairs whilst advancing original research in both

fields only a handful of publications consider the military revolution and the rma in tandem this book breaks new ground conceptually and appeals to an exceptionally large and diverse readership comparative revisionist studies of the military revolution and rma better enable us to comprehend the historical continuum and reveal the new rma for what it is and for what it is shortly to become this book presents original contributions within the epicentre of the military revolution debate the 1500s with an emphasis on gunpowder revolution offensively and defensively the connections with the revolution in military affairs are then made explicit by scholars a practitioner and an analyst with an emphasis on airborne lethal autonomous weapons systems this is a chronologically broad and unique methodological approach to a historical debate that begs for clarification as we enter an era where killer robots will almost certainly take from humans their monopoly on violence

what is total war definitions abound but one thing is certain the concept of total war has come to be seen as a defining concept of the modern age in the age of total war celebrated historian jeremy black explores the rise and demise of an era of total war which he defines in terms of the intensity of the struggle the range geographical and or chronological of conflict the nature of the goals and the extent to which civil society was involved he contends that this era roughly 1860 1945 was markedly different from the warfare that characterized earlier periods and that it is very different from the situation that has evolved since with its emphasis on asymmetrical conflict and limited warfare acknowledging that various definitions are problematic and often contradictory black argues that 1860 to 1945 was an era in which the prospect of war and the consequences of it were crucially important for human history he focuses primarily on conflict between western powers including japanese participation in the russo japanese war trends and developments subsequent to 1945 have combined black asserts to make a return to total war unlikely
