the book brings together 49 chapters related to the field of education the main topics explored here include teacher student interactions pre service teachers children and play early childhood education elements of education children s rights digital education attitudes of students towards the environment art education and problem solving skills among many others it will attract the attention of researchers but will also be of great interest to academics teachers students and staff in social sciences departments and related researchers

an introduction to the mathematics of financial derivatives is a popular intuitive text that eases the transition between basic summaries of financial engineering to more advanced treatments using stochastic calculus requiring only a basic knowledge of calculus and probability it takes readers on a tour of advanced financial engineering this classic title has been revised by ali hirsra who accentuates its well known strengths while introducing new subjects updating others and bringing new continuity to the whole popular with readers because it emphasizes intuition and common sense an introduction to the mathematics of financial derivatives remains the only introductory text that can appeal to people outside the mathematics and physics communities as it explains the hows and whys of practical finance problems facilitates readers understanding of underlying mathematical and theoretical models by presenting a mixture of theory and applications with hands on learning presented intuitively breaking up complex mathematics concepts into easily understood notions encourages use of discrete chapters as complementary readings on different topics offering flexibility in learning and teaching

presidential campaigns have seen revolutionary changes in the past few decades in the united states and elsewhere these changes include rapid advances in communications technology and marketing and survey methodology an increased involvement of non party groups and campaign professionals in electoral politics a decreased role for political parties in the recruitment screening and nominating of candidates and dramatic changes in campaign finance laws while changes in presidential campaigning have not gone unnoticed analysis of these changes is typically included in general works on presidential campaigns and elections or studied individually baumgartner clarifies what is meant by candidate centered as it applies to the organization and operation of presidential campaigns and elections he demonstrates that campaign organizations have become increasingly more central to the campaign effort than party organizations throughout the process of presidential selection and he shows that what is happening to electioneering practices in the united states is also happening although still to a lesser extent in france and russia

classical fortran programming for engineering and scientific applications second edition teaches how to write programs in the classical dialect of fortran the original and still most widely recognized language for numerical computing this edition retains the conversational style of the original along with its simple carefully chosen subset la

higher education is in trouble commentators of all stripes bemoan escalating costs and diminishing quality solutions have been offered from all quarters but tend to be piecemeal and all too often ideological in this tough minded look at the history current climate and future of university education in the united states melvyn l fein reexamines the mission of higher education and outlines what institutions can do to better prepare students for an ever more complex techno commercial society fein argues that students must have the opportunity to explore and discover what works for them and that the most important tool for institutions of higher education is self direction professors must be allowed to teach in their own ways bringing their own experience into the classroom since university missions differ both universities and

professors need the freedom to make decisions independently the imminent need is for a democratic elite consisting of self directed leaders who possess technical and social expertise as well as personal motivation the tools for change are appropriate curricula communities of learners and a genuine marketplace of ideas while there is no magic bullet fein contends that we can and should build on the achievements of the past so as to evolve more responsive educational institutions those that promote merit responsibility and universalism

practicing cultural resource crm archaeologists bemoan the lack of knowledge skill and training of most archaeological field workers this comprehensive training manual is designed to solve that problem neumann and sanford use their decades of field experience to discuss in great detail the complex processes involved in conducting a crm project dealing with everything from law to logistics archival research to zoological analysis project proposals to report production they provide an invaluable sourcebook to archaeologists who do contract work in north america after an introduction to the legal and ethical aspects of cultural resources management the authors describe the process of designing a proposal and contracting for work doing background research conducting assessment testing and mitigation phase i ii and iii work laboratory analysis and preparing a report for the project sponsor throughout the emphasis on real world problems and issues the use of extensive examples and the detailed advice on a host of subjects make this an ideal teaching tool for novice archaeologists and field schools and a handy reference for experienced crm archaeologists the accompanying student textbook by the same authors cultural resources archaeology an introduction introduces the basic elements of crm work to undergraduates visit robert sanford s web page
